TECHNICAL SKILLS

Languages

Python, TypeScript/JavaScript, Java, C++, HTML/CSS

AI / LLM

LLM API Integration, Retrieval-Augmented Generation, Agent Orchestration, Prompt Engineering, Output Evaluation, Vector DBs & Embeddings, Local LLMs (Qwen 3.6, Ornth 1.5)

Frameworks & Tools

React, Git, JUnit, AWS (S3/Route53), Jira/Trello

Concepts

Full-Stack Web Dev, Meta Horizon Worlds API, Open WebUI, Cloud Deployment, Agile/Scrum, Workflow Engineering

SOFT SKILLS

- Self-Directed Learning
- Technical Communication
- Problem-Solving
- Project Coordination
- Cross-Functional Collaboration
- Adaptability

EDUCATION

Southern New Hampshire Univ.

B.S. Computer Science · Expected 2027

Associate's Degree Achieved 2026

- ▶ President's List (Fall 2024)
- ▶ Honor Roll, multiple terms 2024–2026

Coursework: Data Structures & Analysis, OOD, Software Engineering, Operating Systems, Systems Analysis & Design, Test Automation & QA

DANNY FETTER

AI INTEGRATION & FULL-STACK ENGINEER

Junior Computer Science engineer shipping AI-powered and full-stack applications end-to-end. Hands-on experience integrating LLM APIs, building retrieval-augmented workflows, and orchestrating verification loops; comfortable reading, verifying, and owning code in Python, TypeScript, Java, and C++. Shipped a live VR music platform on Meta Horizon and multiple production web apps. President's List.

EXPERIENCE

AI Integration & Workflow Engineer

Independent · Passion Project

2024 – Present

- ▶ Build AI-powered applications with local AI coding assistants — define requirements, orchestrate implementation, then read and verify generated code until fully understood.
- ▶ Configure retrieval-augmented workflows (ingestion, chunking, embedding, retrieval) via Open WebUI and local model stacks.
- ▶ Design evaluation/verification loops that ensure AI-generated outputs meet specifications.

Freelance Web Developer

Self-Employed

2020 – 2023

- ▶ Designed, developed, and deployed responsive portfolio and EPK sites (HTML/CSS + JS) on AWS, managing the full engagement from design through cloud deployment and hosting.

Freelance Audio Engineer

Self-Employed

2014 – 2023

- ▶ Recorded, mixed, and mastered with professional DAWs; delivered client work under deadline alongside musicians and production teams.

PROJECTS

Astro Beat Lab · TypeScript

Meta Horizon Worlds VR Music Platform

github.com/Astraspire/AstroBeatLab

- ▶ Built a real-time, beat-synchronized 25-pad loop system; parsed extensive platform docs via AI research, then implemented the core TypeScript logic independently.
- ▶ Designed multiplayer networking, inventory system, and UI; managed the full lifecycle and shipped a live world on Meta Horizon (web/VR/mobile).

AI Memory Controller · Python

Local Open WebUI Memory System

github.com/Astraspire/memory_tool_owui

- ▶ Built a vector-similarity (cosine/Jaccard) retrieval tool to autonomously audit, rank, and recall context, injecting refined context into prompts — a functional RAG workflow.
- ▶ Designed a user-document injection pipeline automating daily context personalization via scheduled loops.

LetsMath Study Buddy · Python

Self-Contained Web App

github.com/Astraspire/LetsMath_StudyBuddy

- ▶ Built a free pre-calc/calculus study app with flashcards and quizzes; first AI-assisted build, learning structured prompting and verification workflows.

YGO Life Point Tracker · Python

Two-Player Web App

github.com/Astraspire/YGO_LP

- ▶ Built a self-contained two-player life-point tracker for Yu-Gi-Oh as a standalone web application.
